Quality Engineer (m/f/d) Semiconductor Expert

BSH Hausgeräte GmbH | Regensburg | Full time / Part time | Job-ID: 76007567

Your responsibilities

You will be working in an exciting, international environment and contributing personally to the company's success. Challenging tasks and projects await you, such as

- / Define quality requirements for semiconductors to meet quality targets for BSH's connectivity solutions
- / Global responsibility for introduction and release of complex semiconductor components (focus: memories, controllers, processors, connectivity device)
- / Contribute to cross-functional supplier strategy teams by executing supplier and technology assessments with focus on quality capability
- / Consult development during component selection phase to ensure compliance with the defined component strategy
- / Initiate and drive improvement activities, root-cause analysis and effectiveness verification of corrective actions at component suppliers

Your benefits

- / flexible working hours schemes and diverse career opportunities
- / individual development programs and international perspectives
- / company pension scheme and modern healthcare services

Your profile

- / Master's degree in the field of electronics / electrical engineering, physics or comparable
- / Several years of work experience, preferably in semiconductor industry or as supplier quality / component engineer for semiconductors
- / Strong knowledge in semiconductor manufacturing processes and technologies (e.g. flash memories, connectivity devices)
- / Experience in quality methods (8D, 6Sigma), process audits and component qualification - team player, good communication skills
- / Fluent English and advanced German skills
